EDUCATION

Fast NUCES

Bachelor of Science in Computer Science

Islamabad, Pakistan

Aug. 2022 – May 2026

EXPERIENCE

Software Engineering Intern

Genesys Research Lab

Jul. 2025 – Aug. 2025

Islamabad, Pakistan

- Engineered AI interview platform using RAG and Generative AI for dynamic question generation and response evaluation
- Optimized ML inference pipeline achieving sub-4-second latency for real-time question generation
- Deployed containerized application with Docker and secured endpoints with HTTPS and CORS

Data Engineering Intern

Jazz

Jul. 2024 – Aug. 2024

Islamabad, Pakistan

- Designed and managed ETL pipelines handling 100,000+ records daily for data integration and transformation
- Automated routine processes reducing manual effort by 70% and improving operational efficiency

PROJECTS

MelodyMind: AI Music Discovery Platform | *React Native, Python, FastAPI, Pinecone*

2026

- Developed full-stack mobile and web application with React Native frontend enabling chat-based playlist creation and voice-driven DJ interface
- Built RESTful APIs using FastAPI; integrated Pinecone vector database for semantic search on audio embeddings with emotionally enriched metadata
- Implemented responsive UI with real-time data synchronization; deployed backend services with clean, documented API endpoints

E-Commerce Ad Creative Generator | *FastAPI, Docker, React, Prometheus, Grafana, Azure*

2025

- Built full-stack web platform with React frontend and FastAPI inference service to generate AI e-commerce ad creatives
- Containerized microservices with Docker; deployed on Azure Web App with responsive UI and real-time monitoring dashboards
- Integrated Prometheus and Grafana for application observability; documented API endpoints and deployment procedures

DevSecOps: Netflix App Deployment Pipeline | *AWS EC2, Docker, Jenkins, SonarQube, Trivy*

2025

- Architected end-to-end CI/CD pipeline on AWS EC2 with Docker containerization, automated security scanning, and monitoring
- Configured Jenkins pipeline with build, test, SonarQube analysis, Trivy scanning, and EKS deployment with real-time observability

AI-Powered Animated Video Pipeline | *LangGraph, FastAPI, Python, LLMs*

2025

- Built end-to-end web application orchestrating LLMs, TTS, and video generation to produce animated short films from text prompts
- Engineered intelligent editing agent with intent classification to selectively modify script, audio, and video via natural language interface
- Implemented SQLite-based state versioning system enabling complete undo/revert functionality; documented API for multi-step workflows

TECHNICAL SKILLS

Front-End: HTML, CSS, JavaScript, React Native, React

Back-End: Python, FastAPI, Node.js, C#, C++, Java

Databases: MongoDB, PostgreSQL, MySQL, Pinecone

Tools & Platforms: Docker, Azure, Git, Prometheus, Grafana, REST APIs

Core Skills: Responsive Design, API Development, Debugging, OOP, SDLC, Problem-Solving
